

## Subject Index

### A

AC system, 123  
access and interchange, 18  
air conditioning, 179  
air movement, 174  
assessment of structures, 100

### B

brick and masonry, 106  
bridges, 95

### C

canopies, 22  
carriages to carbodies, 38  
CCTV, 156  
compact escalator, 164  
concrete sleepers, 62  
conductor rails, 77  
continuous welded rail, 71, 72  
customer, 2  
cutting slips, 88

### D

DC systems, 127  
demand matrix, 12  
depot requirements, 53  
depot siting, 50  
depots and workshops, 47  
diesel traction, 35  
disabled access, 22  
drainage, 89  
draught relief, 178

### E

earthing AC systems, 126  
earthwork slips, 85  
earthworks, 83  
electric traction, 32, 34  
electrification, 121  
elevated railways, 5  
engineering rolling stock, 45  
escalators, 160  
escalators types, 163  
examination of structures, 107

### F

fans, 176  
fencing, 94  
floating slab track, 79  
flow rates on escalators, 161  
footbridges and subways, 21  
four aspect colour light signalling, 140  
freight rolling stock, 44  
future trends, 181

### G

generation of electricity, 122

### H

hazards, 24  
headways, 136  
heavy duty escalators, 165  
home and distant signals, 137  
hydraulic lifts, 166

**I**

industrial revolution, 1  
interfaces, 149  
interference, electrical, 126  
interlocking, 135

**J**

joints in rails, 70

**L**

level crossings, 145  
lift types, 167  
lifts, 159

**O**

operators, 3

**P**

paved track, 78  
pedestrian flows, 14  
piston effect, 176  
platforms, 20  
point operation and locking, 134  
points, switches and crossings, 74  
prestressed concrete, 102  
public address, 152  
pumps, 169

**R**

radio, 154  
rail fastenings, 65  
rail stressing, 74  
rail wear, 69  
rails, 67  
reinforced concrete, 100  
rolling stock definition, 27  
rolling stock maintenance  
workshops, 47  
route and level, 4

**S**

sand blankets, 90  
shafts, 119  
signalling, 131  
sleepers, 61  
smoke in tunnels, 176  
speed and flow, 10  
staff accommodation, 25  
stair and escalator capacity, 19  
station layout, 7  
station planning objectives, 9  
station standards, 9  
steam motive power, 29  
steel sleepers, 65  
structures, 95  
systems and communication, 147

**T**

telephones, 154  
three aspect signalling, 139  
ticket halls, 15  
timber sleepers, 61  
track ballast, 59  
track components, 58  
track origins, 57  
track welding, 70  
train performance, 41  
train protection, 144  
tunnel linings, 118  
tunnel shields, 114  
tunnelling, 113  
two aspect signals, 138

**V**

ventilation, 173

**W**

welded rails, 70  
welded steelwork, 97  
wheel layout, 36
